

# Insul-Fleece™

## Metalized Mylar Insulated Interfacing

The perfect insulated interfacing for sewing...

- Lunch bags
- Water bottle & coffee cup sleeves
- Shopping bags  
*(keep that ice cream cold on the way home!)*
- Oven mitts & potholders
- Teapot & casserole covers
- Ironing board covers

Keeps hot things hot & cold things cold—*longer*

Metalized mylar is layered between polyester fleece to create a high-quality barrier that reflects heat or cold. This special combination of materials is very flexible and easy to sew through. Once you have sewn it into your project, you can machine wash and tumble dry with no bunching! A handy  $\frac{3}{4}$  yard cut is enough for a large lunch bag or several potholders.

Size: 27" × 45" ■ One Sheet CRAFT PACK
